

Fuel Sample Packaging

1 Gallon, Closed-Head Steel Drum (1A1)

Product codes: **DR1A1-1E & DR1A1-1EB**

This versatile 1 gallon fuel shipper is the standard for petrochemical samples; this model features:

- UN rating: **UN1A1/X1.5/250**
- epoxy-phenolic lining
- multiple bungs/closures available
- ideal for samples of gasoline, diesel, jet-fuel & other chemicals
- rated for packing group I, II or III
- package samples in LTD. QTY. or UN boxes (as below) or ship on their own as UN specification drums
- designed for ground, marine, & air shipments
- meets 95 kPa pressure test for air shipments of liquids (air approved)
- box quantity: 25
- pallet quantity: 175

DR1A1-1E

- hexagonal closure easy to open & close by hand

DR1A1-1EB

- closure accommodates a variety of tightening tools
- inverted design & raised bung allows for ~100% liquid extraction

• traps 174 mL of liquid

• traps 12 mL of liquid

Limited Quantity Box

Product code: **BX-11LQ**

- ideal for ground transport of gasoline, diesel & jet fuel
- pre-printed w/ required marks for limited quantities (TDG 1.17)
- meets carrier requirements for protective outer packaging
- bundle quantity: 25

4G UN Box

Product code: **BX-11RD**

- designed for fully-regulated gas, diesel, jet fuel & crude shipments
- suitable for domestic and international ground, air & marine transport
- UN rating: **UN4G/X9.8/S**
- allows for packing group I, II or III
- bundle quantity: 25

KIT INCLUDES:

UN BOX
+
ANTI-STATIC LINER BAG
